

# Activities of Daily Living After Your Heart Procedure

## *Important precautions and guidelines*

*This handout gives important guidelines to follow to help your healing and keep you safe after your procedure.*

### **Your Procedure**

You recently had this procedure:

- Transfemoral valve replacement
- Transapical valve replacement
- Mitral clip procedure
- Cardiac catheterization

Type: \_\_\_\_\_

### **General Precautions**

Follow these precautions for:

How long: \_\_\_\_\_

### **For Your Safety**

- Do **not** lift anything that weighs more than 5 to 10 pounds (a gallon of milk weighs almost 9 pounds). This includes grocery bags, laundry baskets, babies, and pets. Ask for help as needed.
- Do **not** hold your breath or strain or bear down while getting up or having a bowel movement.

### **Bathing**

- You may shower. Gently clean your incision with soap and water and gently pat to dry. Do **not** rub or scrub.
- Do **not** soak in a bath tub or hot tub or go swimming.
- Do **not** apply any lotion or powder on your incision site.
- If it is hard for you to shower, your occupational therapist (OT) may advise you to use tools such as a shower chair, a hand-held shower head, a non-skid mat, a long-handled sponge, or a grab bar.

*After your procedure, closely follow the precautions in this handout.*

## Getting Dressed

- To keep from falling, sit down to get dressed.
- If it is hard for you to put on your underwear, pants, socks, and shoes, your OT may advise you to use tools such as a reacher, dressing stick, sock aid, and long-handled shoehorn.

## Extra Instructions

### Transapical Valve Replacement

If you had a transapical valve replacement, follow all instructions listed under “General Precautions.”

Also follow these guidelines for 2 weeks **when using your arm that is on the same side as your surgery** (your surgical arm):

- Do **not** lift your elbow above your shoulder.
- Do **not** reach behind you when bathing, toileting, or putting on or taking off your clothes. Use your non-surgical arm.

### Radial Artery Access

If you had your radial artery accessed for your procedure, follow all instructions listed under “General Precautions.”

Also follow these guidelines **when using your arm that is on the same side as your surgery** (your surgical arm):

- For 48 hours, do **not** lift, push, or pull anything.
- For 5 days, do **not** lift anything that weighs more than 5 pounds. (A 2-liter bottle of water weighs almost 5 pounds.)

## Questions?

Your questions are important. Call your doctor or healthcare provider if you have questions or concerns.
