UW Medicine

Baby's DayA record of your baby's feedings, urine, and stool

Use the forms in this chapter to record when your baby feeds, pees (urinates), and poops (has a bowel movement). Write down the time each occurs and check the box.

Watch your baby for feeding cues. Feed any time your baby seems ready. Having your baby at your breast at lot is good for your baby and your breast milk supply. If your baby is very sleepy or is late preterm, wake them up to feed at least every 3 hours.
