During a telemedicine visit, you and your provider can see each other on your computer, tablet, or smartphone.

About Telemedicine Visits

A telemedicine visit is a way to get the healthcare you need when you cannot come to the clinic to see your provider. UW Medicine telemedicine visits use a video service called Zoom.

About Zoom

Zoom allows you to see and talk with someone at a distance. It works on a computer, tablet, or smartphone.

Zoom is free to use. You do not need to create an account.

Your Safety and Privacy

Your telemedicine visit will be safe, private, and secure. Your photo and voice will not be recorded or stored. All your information is protected, just as if you were meeting with your healthcare provider in the clinic. Zoom complies with the Health Insurance Portability and Accountability Act (HIPAA), which protects your health privacy.

How to Prepare for Your Telemedicine Visit

- Before your first telemedicine visit, set up Zoom on your device.
- You need to have:
 - A computer, tablet, or smartphone with a camera that faces you, so that your provider can see you
 - An internet connection
- If you want to check your internet connection, visit zoom.us/test to join a test meeting.
